Education

Parul Institute of Engineering & Technology, Parul University , Gujarat

2021 - 2025

- B-TECH Computer Science Engineering | CGPA: 7.22

(expected)

Sri Chaitanya Educational Institutions, Hyderabad

2019 - 2021

- TSBIE (Class XII), Percentage: 91%

Siddhartha Group of School, Karimnagar

2018 - 2019

- BSET (Class X), CGPA: 9.8

Skills

C | Java | Python | Machine Learning | JavaScript | HTML & CSS | React | MongoDB | MySQL | DSA | Git | Azure

Work Experience

Vodafone Idea Foundation | Virtual Internship

Jun' 24 - Jul' 24

- Conducted data analysis on automotive industry data using Python libraries such as Pandas and NumPy, resulting in actionable insights that improved the understanding of market trends for CarDekho.
- Developed and presented interactive dashboards using Power BI for an HR analytics project, enabling real-time tracking of key HR metrics and enhancing data-driven decision-making.
- Gained hands-on experience with various data analytics methodologies, including descriptive, diagnostic, and predictive analytics, and applied these techniques to deliver comprehensive reports and visualizations

Projects

Financial Analysis System

Aug'24

React | Python | Flask | MySQL

- Engineered a comprehensive financial analysis system for analyzing company transactional data and providing department-wise insights. Implemented features to estimate profits and losses of different departments, aiding in loss prevention and strategic decision-making.
- Created interactive dashboards and visualizations to help users understand financial metrics and trends.
- Designed a secure backend architecture, safeguarding sensitive user data and ensuring transaction integrity for 10,000+ weekly transactions, with zero security breaches.

AI Powered Food Ordering ChatBot

Jun'24

Dialog Flow | Python | MySQL | FastAPI | NLP

- Enhanced the food ordering process by implementing an AI chatbot, reducing average order time and improving customer satisfaction.
- Achieved a 90% accuracy rate in processing user requests by conducting iterative testing and refining the AI model.
- Integrated natural language processing (NLP) techniques into the AI chatbot to effectively interpret and respond to user queries, resulting in a more intuitive and efficient ordering experience.

Real-Time Weather App

Jul'24

React | API | Realtime tracking

- Developed a cutting-edge, responsive weather app with React.js, providing real-time updates and accurate forecasts; enhanced user experience.
- Integrated external weather APIs to provide accurate and current weather data, displayed in an intuitive and user-friendly interface.

Academic and Extracurricular Achievements

- Finalist in Yuva Gyani Talent Test 2019.
- Participant in Sigfest 23-Datathon organized by Manipal University.
- Solved over 200 problems on LeetCode, HackerRank, and GeeksforGeeks.

Positions of Responsibility

Captain - Tulips House

- Spearheaded Tulips House in diverse inter-house competitions encompassing sports, academics, and cultural events.
